Materials for creative

Catalog shopping for art materials

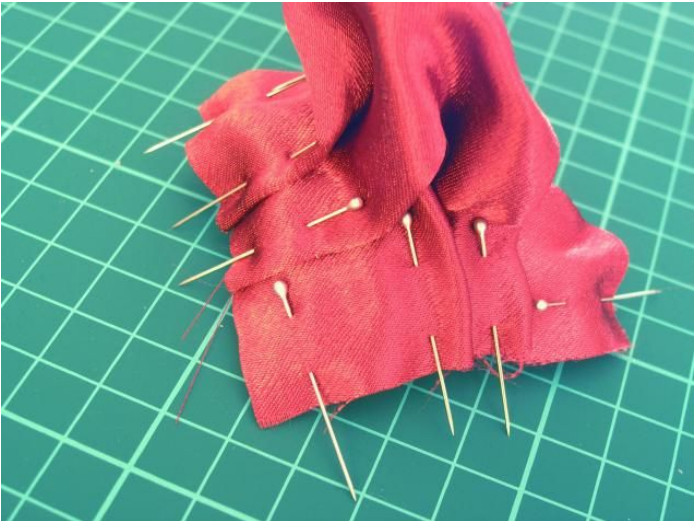

Nature is an inexhaustible source of inspiration in creating furnishings, apparel and accessories, jewelry. We strive to realize the beauty in even the most ordinary things around us every day. This time my inspiration were the roses. And I propose a simple master-class on making "Rose" in the art of origami fabric. Creation of elements in the art of origami is an essential part of the master class, and here's how to use them - tell your imagination. I decorated the "roses" necessary in the life of every woman's thing - makeup 🧴 Where did without it! So.

A. Cut 6 squares of side 12 cm from the crepe satin and 6 squares with sides of 6.5 cm from the conventional cotton. Small squares - is the foundation on which to form a rose.

Two. Pins pins corners of a large square to the corners of small squares. Then form the two folds in the center of each side.

Read @ livemaster_ru

4. Good fluff folds and pin them for convenience.

A close-up photograph showing a person's hand pinning a small, square piece of red fabric onto a green cutting mat. The fabric has a ruffled or pleated center. Several silver pins are visible, securing the fabric to the mat. The mat features a white grid pattern and numerical markings along the right edge.

In ykraivaem second side and the valve, synthetic padding their quilt, sew parts (valves - side with roses - quilted side). Cuts

out the lining and pin it to the wrong side. Fasten the magnetic button and sew details of the edge is indented 0.5 cm
Process piping edge of the opposite valve. Sew the sides of the cosmetics and process piping the remaining edges.

The valve can be decorated with embroidery.

Enjoy all the needlework!

Wow!)))

Now I know where to dispose of cut satin ribbons!
