## Generating signature code

*Rebecca*

You can use the signature however and wherever you want to. To add the signature to blogs, your posts on forums, to email messages, on websites, you should generate a special code to be inserted. The following code generation wizards will help you with it:

[Generate HTML code](#)

Select this wizard if you want to generate a HTML code. HTML code is used for adding signatures to blogs, websites, e-mail messages.

[Generate BB code](#)

Select this wizard if you want to generate a BB code. BB code is used for adding signatures to forums.

Note: Click on "Generate BB code signature"

---

## Generating BB code

Please select what code do you want to generate?
