

Quilt fabric Christmas balls

Here is a very old way of making your own Christmas balls. All you need is Styrofoam balls and your Christmas fabric (leftovers).

- Cut squares from about 3 inch of your favourite Christmas fabric or leftovers.
- Take a Styrofoam ball.
- Lay the fabric on the ball and push with the backside of a spoon the edges fabric into the ball.
- If you like to have straight edges, you can pre-carve the ball and then push the fabric in the lines you made.

- Completely cover the ball with pieces of fabric.

This is an example how I used the Christmas balls.
