

## Bowtie Block Page Two

Take a basting stitch in the center of each side of the small central square. You will stitch through the two layers of the top square, but not through any of the layers of the larger bottom layer. Pull up the basting thread so that it meets in the middle. It will look like a 4 petaled flower.

Pinch the folds of the 'flower' together and whip stitch along four folds of the 'flower'. It will look like a square with one corner cut off. When you turn the block over it will look like the last image in the column with two tucked sides .

Gently pull open from the right side and press carefully. The dimensions will be 3 1/2" x # 5/8" Size to 3 1/2' on all sides.
