

Bloc_Loc

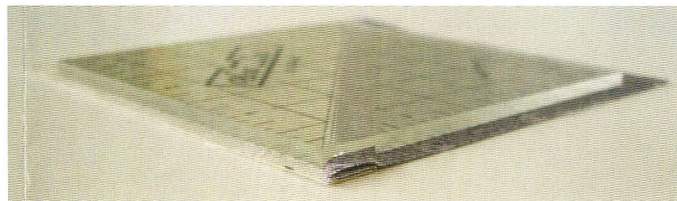

is a revolutionary new channel technology to allow you to accurately

“square up”

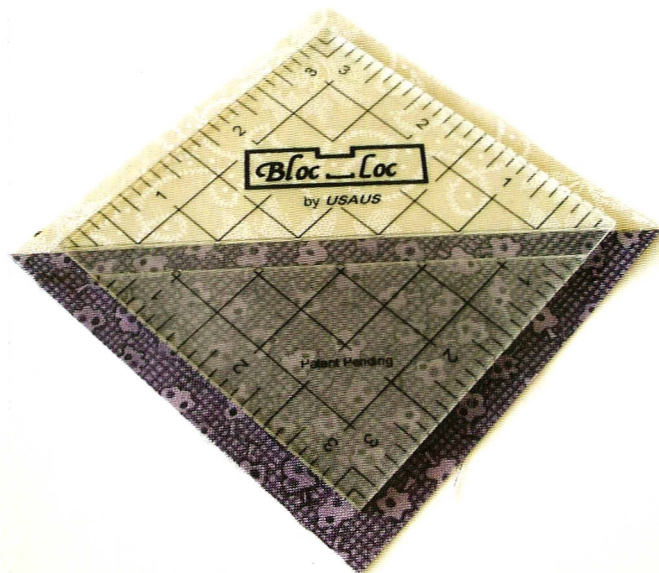

a half square triangle block while eliminating slipping and ruler rock completely.

The Patent Pending ***Bloc_Loc*** technology locks on to the seam allowance and allows the quilter to square up in just seconds.

You can see in the picture below how ***Bloc_Loc*** makes it easier

There's no need for a turntable.

There is no need to lift the ruler

Simply place the ruler onto the block, slide it so it locks onto the seam allowance, trim the first two sides.

Then turn the block with Bloc_Loc "locked on" and trim the other two sides.

Safe, efficient, and above all else, accurate each and every time!

***Nothing could be easier,
faster or safer!***

***Bloc_Loc is available in
six sizes, ask your quilt
shop.***

1.5" up to 6.5" square

***A video of Bloc_Loc in
action is on youtube.com***

Simply type in:

“How to square up a half square triangle”
then look for Janna's video.

We are sure you will be impressed!
