Ok...I'm not great at this, but no your dimensions are not right.

C- you only need 4..not 6

D...7/8" x 6/1/2"

E 7/8" x 1 1/2"

F 1 1/8" x 7 3/4"
 G 1 1/8" x 12 1/2"

and I think that as it is...your dimensions are not 9 x 12 over all..but 12 x 12...now mind you...I have had only 1 cup of coffee. Just check it again to make sure....cause...I could easily be wrong!

May I always be the person my pets think I am..

I just added the finished measurements from top to bottom, and they DO add up to 9". $7/8 + 5/8 + 1-1/2 + 3 + 1-1/2 + 5/8 + 7/8$

By making D only 7/8 instead of 1-1/8, that would only give me a 1/8" seam when connecting it to the BCB piece and to the F piece.

For E & G pieces, if I add another 1/2" would't that put the total to 12-1/2 x 9-1/2?

The total measurements can be no more than 12x9.

FIXED: I see that my F was wrong....need to add another 1/4 to that

Why only 4 geese (C)? There are 6 geese. 2 on top, 2 on bottom and 2 on the sides.

Note, I am still using 1/4' seams. Also, that the 7/8" border around the outside will be having the 1/4" binding on it, so that will knock the pattern down to 5/8" to match the inner border.

The answer is no, unless you ask.

Found another error too:

E needs to be cut at 10-3/4 and not 9-1/2 (becasue of the added D pieces)
 That would make finished E at 10-1/4"

The answer is no, unless you ask.

With your changes to E and F, I get the same measurements as yours. Good job! 😊

Follow your Dreams (except that one where you fly...that never ends well).

How did you get that animated icon in your signature?
I have one I'd LOVE to use

The binding is included in this dimension?

I am an idiot...I totally didn't see the FG on the sides to count this morning.

In my defense..I did tell you that I hadn't had enough coffee...

Please show us the finished product...it looks like it will be cool!

May I always be the person my pets think I am..

Um, not sure, and not as experienced as some on here, but did you add in the HST's or smaller geese below/above/to the sides of the Flying Geese or the 3 x 3" center square accounting for the 6 in the directions?

Out of one-1 1/2"x 3" block you get two geese because you cut it in half.

This accounts for the 6 larger geese. You then cut three of these in half again for the smaller triangles. The pattern requires a total 6 which makes sense.

As far as the measurements, I am not that good at the math part. Just ask

my math teacher

I love this time of year. Leaves are turning their brilliant colors; when they are falling, twisting, turning, as they are falling to the ground; when they crunch and crackle under foot as we walk over them doing chores or walking from class to class; and of course the smell of them. And in the end, they are added to the garden where they enrich the soil for next years garden of bounty.
