

# Cross wound spool holder for featherweights and other vintage sewing machines

(© Courtney Willis, 2019)  
(courtney.willis@unco.edu)

Diagram is actual size. Smallest division on graph paper is about 1/8 inch giving a width of about 4 inches and a height a bit less than 7 inches (although exact size in not particularly critical. I made mine by bending an old coat hanger,

To use make sure your machine has a good spool felt to keep the holder from scratching your machine. Hold the vertical end of the wire next to the spool pin and slide a plastic straw over both the vertical piece and the spool pin as shown in first picture. The second picture shows how the holder is threaded.
